

A Simpler Way to a Secure Network...

Announcing SUN MANAGED SECURITY SERVICES (MSS) “90 DAY FREE TRIAL”

Managing security has never been easy. Sometimes the easiest way to fix a problem is to give it to someone else – ideally, someone else who does nothing but solve that kind of problem all the time. Say hello to Sun Managed Security Services!

You want to be able to sleep at night, rather than worry about your systems security. You will sleep much better knowing that your network is being watched over by Sun's security team, who can address and manage the security risks and unpredictable events inherent in modern network computing.

What is Sun Managed Security Services (MSS)?

Sun MSS provides remotely delivered services for managing and monitoring your security infrastructures. MSS are part-numbered and priced to provide flexibility to address the right service solution dependent upon the number and types of security devices: VPN, Firewall, Host-based Intrusion Detection Systems (HIDS), Network-based Intrusion Detection Systems (NIDS) and additional services for ongoing continuous assessment and alerting of network vulnerabilities. Sun's TRY BEFORE YOU BUY promotion will focus on IDS management.

How Does the 90 Day Free Trial Work?

It's easy: Commit some time to deploy – free of charge, for 90 days – two IDS sensors on your network. These IDS sensors are from industry leader SourceFire, to be managed and monitored by Sun MSS Powered by VeriSign. After 90 days you will have the option to purchase the equipment and extend the service for a fee or simply return the equipment and cancel the service.

What Will You Receive During 90 Day Free Trial Period?

- Use of two SourceFire IDS sensors
- Remote installation
- Device uptime monitoring
- Security event monitoring and response
- Access to Sun MSS customer portal
- In-depth analysis of major events, available at Sun MSS customer portal
- IDS monitoring reports available at Sun MSS customer portal
- Ability to provide pre-defined actions upon detected vulnerabilities
